WORKING WITH ABSOLUTE_PATH

Your company has 3tier architecture

- A. admin directory contains ,director directory, which in turn contains assistant_Dir directory who in the end contain accounting directory, the accounting directory contains 5file from named accounting sheet1 to 5

your are task by your manager to create this architecture:

- A. The hr directory contains the payment directory, there is 10 employees in the company your are task to create a paysheet file for each of those employee as paysheet1 to 10
- B. The assistant_Dir requested all the 10 paysheet file ,so you are task to move all those paysheet file to the assistant_Dir directory
- C. One more time the assistant_Dir decide the sale department should be under is authority .your are task to copy the entire directory of sale inside the assistant_dir directory
- D. sale department has 10 employee you are task to create 10 technical sheet for each of them as technicalsheet1 to 10
- E. The top management decide to fire all the accounting team you are task to delete everything inside the accounting directory without deleting the directory himself
- F. A new department is created as marketing so you are task to create marketing directory ,to also create another directory call sub marketing inside the marketing directory ,then created 7file for the marketing team as market1.txt to market7.txt
- G. finally your are task to copy all the 7marketing file to the sub marketing file with just one command
