DEPLOY THE HALLOWEEN APP USING K8S
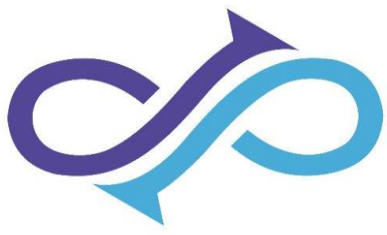

on your first internship day you are given this task
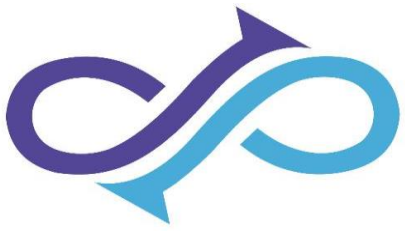

1- deploy the HALOWEEN website using k8s

the image has been given to you:
devopseasylearning2021/s5fritz:latest

2-the services need to be expose to the outside world

a/which k8s object is responsible for that

b/how many type of services do we have and give a brief discussion around each type

3-expose the Halloween to the outside world using the **LoadBalancer service**

4- your manager need **10 instances** of halloweenapp running at each moment of time

a/what the k8s object responsible of that then give a brief discussion around the k8s object

b/delete 3 of the Halloween instances how many instances of the Halloween will left out of 10
